|                      | Ra  |  | 2.25 ~ 3.75 | 1.80 ~ 3.00 | 1.35 ~ 2.25 | 0.43 ~ 0.72 | 0.25 ~ 0.42 |  |  |

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)

Note: Set flush cup clearance as shown as Top chart.

Note: Please use the straightness compensation function.

(If wire breakage occurs, set FA Adjust to -1 or -2 on monitor screen.)
